EDUCATION

- VIT Bhopal University** Bhopal, India
Bachelor of Technology - Computer Science with Specialisation in AIML; CGPA: 8.77/10 Sep 2023 - May 2027

SKILLS SUMMARY

- Languages:** Python, JavaScript, HTML5, CSS3, TypeScript
- Frameworks & Libraries:** Express.js, React.js, Node.js, Next.js, REST APIs, Tailwind CSS
- Tools & Platforms:** Git/GitHub, MongoDB, VS Code, Postman, AWS
- Relevant Course Work:** DSA, OS, DBMS, Computer Network

EXPERIENCE

- Fraternity of Young Innovators - VIT Bhopal** On-Site
Technical Core Member Feb 2025 - Feb 2026
 - Club Homepage Development:** Designed and developed the official club homepage using the MERN stack, improving online engagement by 40% and enhancing accessibility for 500+ students. Implemented responsive UI with React.js and optimized backend APIs with Node.js and Express.js.
 - Frontend Optimization:** Implemented responsive UI components and optimized website performance using lazy loading, code splitting, and image compression, reducing page load time by 30% across desktop and mobile devices.
 - Team Collaboration & Event Management:** Collaborated with a team of 15+ members to manage technical operations, event execution, and workflow planning. Led the technical onboarding of new members and conducted workshops on web development best practices.
- AmasQIS - Oman** Remote
Full Stack Web Developer/Tester Intern Sept 2025 - Nov 2025
 - Web Application Development:** Developed and tested 3+ scalable web applications including an HRMS platform with employee attendance tracking, leave management, and payroll modules, along with responsive company homepage solutions.
 - API Testing & Debugging:** Performed comprehensive API integration and testing using Postman, identifying and resolving 20+ backend issues including authentication bugs, data validation errors, and response formatting problems, improving overall application reliability by 25%.
 - Database Optimization:** Optimized MongoDB aggregation pipelines and indexing strategies, reducing query response time by 40% for complex data retrieval operations.

PROJECTS

- PrepWise - AI-Powered Mock Interview Platform** Link
 - Developed an AI-driven platform enabling real-time voice-based technical and HR interviews using **Vapi AI** for speech synthesis/recognition and Google Gemini API for dynamic, context-aware question generation.
 - Built responsive dashboards with React.js and Next.js, featuring interview history, performance analytics (response time, clarity score, relevance), and replay functionality.
 - Designed RESTful APIs using Express.js and optimized MongoDB queries to handle concurrent users with sub-100ms latency.
- ResumeIQ - AI-Powered Resume Builder & Skill Gap Analyzer** Link
 - Built a comprehensive career platform leveraging Google Gemini AI to parse resumes, identify missing ATS keywords, and suggest improvements, increasing ATS compatibility scores by up to 40%.
 - Implemented AI-driven skill gap analysis that compares user skills against industry job descriptions, generating personalized resumes.
 - Developed a recruiter dashboard with job posting, applicant tracking, and AI-generated candidate shortlisting based on compatibility scores.

AWARDS & CERTIFICATIONS

- GirlScript Summer of Code (GSSoC) Contributor - Top 2000 Selected Globally - 2026** Contributed to 5+ open-source repositories, focusing on frontend bug fixes, feature enhancements, and documentation. Gained expertise in collaborative Git workflows (forking, PR reviews, issue tracking) and agile development.
- Applied Machine Learning in Python - University of Michigan (Coursera)** Completed specialization covering supervised learning, unsupervised learning, regression, classification, clustering, PCA, and evaluation metrics and scored 90%.
- CyberShield Hackathon Participant** - Developed a Chrome extension Safe Rank to provide innovative security solutions and demonstrate proficiency in threat detection and mitigation strategies.
